Professional Profile

Full-Stack Developer with knowledge in React, Next.js, TailwindCSS, .NET, and NestJS. Focused on building intuitive and accessible web applications while following best practices such as Clean Architecture and REST API design. Interested in learning and applying modern technologies to develop scalable and maintainable solutions oriented toward delivering a great user experience.

Professional Experience

Centro Agrícola Cantonal *July 2025 – July 2026*
Puntarenas | Full Stack Developer

- Developed an informative **Human Resources (HR) landing page** for end-users and administrative modules, improving access to employee services and internal HR information.
- Implemented the **backend business logic for the bonus and severance pay calculators**, enabling automatic calculations based on salary data and labor rules.
- Implemented the **business logic for employee attendance tracking and automatic vacation accrual**, calculating earned vacation days based on company policies, employee attendance, and working schedules.
- Developed the frontend interface for the bonus calculator restricted to HR personnel, allowing authorized users to input and manage calculation data through a responsive interface.
- Worked in a self-managed agile team environment using Git, GitFlow, and Azure DevOps for version control, task management, and progress tracking.
